

Education

Rutgers University, New Brunswick, NJ, Aug 2025

Bachelor of Arts in Computer Science,
Bachelor of Science in Psychology

- Summa Cum Laude in Computer Science and Psychology
- GPA: 3.86
- Dean's List for all fall and spring semesters

Employment History

Digital Transformation Specialist, NJ Department of Community Affairs, Jan 2026 – May 2026

Trenton, NJ (Full-Time)

- Design, develop, and maintain application programs supporting electronic data processing in a multi-user, multiprogramming production environment for statewide housing and community resource programs, including intake workflows, document generation systems, and training registration tools, using SimpliGov
- Analyze agency work methods and data processing requirements across 10+ DHCR program areas to prepare and implement automated workflow systems aligned with established business and regulatory requirements
- Perform code modification, testing, and debugging of SimpliGov application modules in online preproduction and production environments, and provide technical support functions including resolution of workflow execution issues and data submission errors to maintain uninterrupted operations
- Configure and manage user access controls and security permissions across SimpliGov and ServiceNow, applying countermeasures for network security to support controlled access and protect sensitive program data
- Apply data base/data communications approaches to integrate and maintain Postman-tested API connections and database-driven form logic, supporting consistent data access and validation across interconnected application systems
- Develop and conduct training programs in data processing for agency personnel on SimpliGov, Amazon Connect, and ServiceNow, and prepare clear, concise user, operations, and programming documentation in accordance with agency standards
- Design and build an IVR system using Amazon Connect, utilizing telecommunication components to automatically route callers to dedicated housing, utility assistance, and lead program submenus and enable automated follow-up SMS with program resources
- Lead requirements gathering and coordinate with agency personnel at NJOIT to develop and enhance the HMIS Help Desk in ServiceNow, identifying and resolving operational inefficiencies and improving system utilization for stakeholder organizations statewide
- Collaborated with grant program stakeholders using SAGE (grant management system); designed and implemented a parallel Grant Application Scoring Workflow in SimpliGov, gaining working knowledge of grant intake and evaluation processes
- Integrated CRM data from the DCAid (NJ statewide housing assistance platform) portal into Power Automate workflows, enabling automated process flows tied to client-facing application data

Digital Transformation Intern, NJ Department of Community Affairs, Oct 2025 – Jan 2026

Trenton, NJ (Full-Time)

- Designed, configured, and deployed multi-user application programs by analyzing government program requirements and translating them into secure, scalable electronic data processing solutions
- Led end-to-end development, maintenance, and installation of application programs including requirements gathering, testing, and debugging for services used by 1000+ NJ residents and 450+ internal employees
- Performed analysis of work methods and processes for the Division of Housing and Community Resources to design and prepare systems aligned with established business and regulatory requirements

Employment History

Resident Assistant, Rutgers University, Aug 2023 – Jun 2025

New Brunswick, NJ (Part-Time, 10
hrs/week)

Research Assistant, Aresty Research Center, Sep 2024 – Jun 2025

Piscataway, NJ (Part-Time, 9
hrs/week)

Teaching Assistant, Rutgers University, Jun 2023 – Apr 2024

Piscataway, NJ (Part-Time, 8
hrs/week)

- Built and maintained public-facing workflows including the NJ HOMES Picture Submission Workflow, and Winter Termination Self-Certification Form, configuring system logic, API integrations, and data sources using SimpliGov, Postman, and ServiceNow
- Managed resident support and conflict resolution for a 500+ student community in the Cook-Douglass campus, coordinating resources and services across individuals
- Provided students with resources, support, and maintenance with the residence building
- Increased resident engagement through target communication and outreach initiatives
- Collected and analyzed research data on how young children acquire number words as part of a team-based cognitive development study
- Maintained precise records of research outcomes, ensuring data integrity and compliance with institutional standards
- Presented findings on individual differences in early counting recognition at the 21st Annual Undergraduate Research Symposium
- Facilitated weekly discussions on mental disorders, enhancing 16 interns' understanding and fostering a supportive learning environment
- Redesigned an official Robert Wood Johnson University Hospital psychiatrist webpage using Squarespace, improving usability, navigation, and access to key information

Projects

- Winter Termination Self-Certification Program (2025): Designed an application-based document generation system to provide utility contact information for more than 1000+ NJ residents, improving communication in accordance with Board of Public Utility regulations to ensure protections are in place to prevent utility shutoffs
- Program Manager Engagement Workflow (2025): Designed and implemented requested requirements to create an online form to support the collection of program-specific information from managers for web developers to update DCAid content accurately
- Equal Employment Opportunity (EEO) Training (2025): Added a calendar feature to improve participation rates and integrated a post-training survey to collect feedback and enhance session quality
- Shelter Bed Management Workflow (2025): Led a training session for shelter staff, training users on performing intake, managing inventory, and registering individuals experiencing homelessness
- 21st Annual Aresty Undergraduate Symposium (2025): Analyzed developmental data on counting recognition in children aged 14–18 months old and presented findings to diverse academic and professional stakeholders
- Movie Recommender System (2024): Built a collaborative filtering model to predict user ratings and generate personalized movie recommendations using Python, NumPy, and PyTorch
- RUHack - Nate the Transit Mate (2023): Developed conversational AI chatbot integrating NJ Transit's FAQ, ticket system, and schedules using Google Cloud and Dialogflow
- COVID Compass (2020): Used HTML, CSS, and JavaScript to create a website to help users locate hospitals based on COVID-19 case volumes, awarded 1st in the district

Skills

SimpliGov, ServiceNow, Amazon Connect, Workflow Automation, Java, Python, C, Stakeholder Collaboration
